

## ABI MONTHLY REPORT<sup>1</sup> – April 2025 (Main evidence)

Since October 2023, market rates have gradually declined following the ECB's cuts. In the first months of 2025, short-term rates further decreased, while long-term rates, despite the decline in the first days of April, recorded an overall increase.

### MARKET RATES

In the first 10 days of April 2025:

1. **The 3-month Euribor rate** averaged **2.32%**, down 12 basis points from March 2025 (2.44%) and 52 basis points lower than December 2024 (**2.84%**).
2. **The gross six-month BOT rate** was on average **2.15%** decreasing by 14 basis points compared to March (**2.29%**) and 47 basis points lower than December 2024 (2.62%).
3. **The 10-year IRS rate** (widely used in mortgages) averaged **2.59%** down 8 basis points from March (2.67%) and up 36 basis points from December 2024 (**2.23%**).
4. **The gross BTP rate** was on average **3.82%**, down 3 basis points from March (**3.85%**) and up 48 basis points from December 2024 (**3.34%**).

### LENDING INTEREST RATES

#### 5. In March 2025:

- **the average rate on new business loans decreased to 3.84%** from 3.99% in the previous month and 5.45% in December 2023;

---

<sup>1</sup> The ABI monthly report makes available a series of quantitative information before any other survey regarding the same data. This is possible because the banks themselves have produced this information.

- **the average rate on new loans for house purchasing decreased to 3.14%** from 3.18% in the previous month (4.42% in December 2023);
- **the average rate on total loans** (i.e., those agreed upon over the years) **decreased to 4.22%** from 4.28% in the previous month (cf. Table 1).

### INTEREST RATES ON BANKING FUNDING

6. The **interest rate on new deposits with agreed maturity** (i.e. certificates of deposit and time deposits) in March 2025 **was 2.54%**. In February this interest rate was higher than the euro area average (2.62% in Italy; 2.40% in euro area). **Compared to June 2022**, when the interest rate was 0.29% (the last month before the start of the official interest rate hikes) **the increase is 225 basis points**.
7. **The yield on new fixed-rate bond issues in March 2025 was 2.22%** with an increase of 91 basis points compared to 1.31% in June 2022.
8. In March 2025, **the interest rate on total amounts of deposits** (current accounts, savings deposits and certificates of deposit), **was 0.79%** (0.82% in the previous month; 0.32% in June 2022).
9. **The interest rate on current account deposits was 0.38%** (0.39% in the previous month; 0.02% in June 2022), taking into account that the current account allows the use of a multitude of services and does not have the function of investment (cf. Table 2).

### SPREAD BETWEEN THE LENDING RATE

10. The **spread on new business** (calculated as the difference between the rates on new loans and new funding) with household and non-financial corporations **in Italy**, in March 2025 was **189 basis points**.

### STOCK OF CUSTOMER FUNDING

11. **Indirect funding**, i.e. investments in securities held by banks (both under management and held directly by customers) **increased of 153 billion between February 2024 and February 2025** (49.0 billion attributable to households, 18.5 to non-financial corporations and the remaining to other sectors, financial companies, insurance companies, public administration).

12. In March 2025 **medium- and long-term funding**, i.e. through bonds, increased by **4.0% yoy** (+6.3% in the previous month).
13. **Deposits**, in their various forms, **increased by 1.2% yoy** in March 2025 (+1.5% in the previous month).
14. In March 2025, **total funding** (deposits from resident customers and bonds) **increased by 1.5% yoy** continuing the positive trend observed since the beginning of 2024 (+2.1% in February 2024; cf. *Table 3*).

#### **BANK LENDING**

15. Slowing economic growth helps keep demand for loans low: in March 2025, compared to a year earlier, **loans to households and non-financial corporations** for the first time since March 2023, did not record a negative rate of change, remaining unchanged compared to a year earlier (-0.6% in the previous month); **in February 2025 loans to non-financial corporations were down by 2.1% yoy while those to households increased by 0.7%** (cf. *Table 4*).

#### **CREDIT QUALITY**

16. **In February 2025, net non-performing loans** (i.e., the total of bad loans, unlikely-to-pay exposures, and past due and/or overdrawn exposures, calculated net of write-downs and provisions already made by the banks) decreased to **30.2 billion euros** from 32.1 billion in September 2024 (30.5 billion in December 2023). Compared to their peak level of 196.3 billion reached in 2015, they have decreased by 166 billion.
17. **In February 2025, net non-performing loans represented 1.46% of total loans.** In September 2024, this ratio was 1.54% (1.41% in December 2023; 9.8% in 2015; cf. *Table 5*).
