

ABI MONTHLY REPORT¹ – May 2024 (Main evidence)

In the last months, the first signs of a decrease in market rates have been appearing compared to the previous maximum values and compared to the ECB rates.

MARKET RATES

In the first 15 days of May:

1. **The BTP rate** was on average **3.82%**, **down 117 points** compared to the maximum recorded in **October 2023**.
2. **The 10-year IRS rate** (widely used in mortgages) was on average **2.77%**, **down 75 points** compared to the maximum recorded in October 2023.
3. **The six-month BOT rate** was on average **3.66%**, **down 39 points** compared to the maximum recorded in October 2023.
4. **The 3-month Euribor rate** was on average **3.82%**, **down 18 points** from the high recorded in October 2023.

¹ The ABI monthly report makes available a series of quantitative information before any other survey regarding the same data. This is possible because the banks themselves have produced this information.

LENDING INTEREST RATES

5. In April 2024:

- **the average rate on new loans for house purchasing decreased to 3.67%**, compared to 3.79% in March and 4.42% in December 2023;
- **the average rate on new business loans was 5.32%** (5.26% in March 2024 and 5.45% in December 2023);
- **the average rate on total loans** (therefore agreed upon over the years) **was 4.80%** (same value in the previous month; cf. Table 1).

INTEREST RATES ON FUNDING

6. As a result of the decline in government bond yields, the **interest rate on new deposits with agreed maturity** (i.e. certificates of deposit and time deposits) in April 2024 **is 3.63%**. In March 2024 this interest rate was higher than the euro area average (3.67% in Italy; 3.50% in euro area). **Compared to June 2022**, when the interest rate was 0.29% (the last month before the start of the official interest rate hikes) **the increase is equal to 334 basis points**.
7. **The yield on new fixed-rate bond issues in April 2024 is 3.81%** (1.31% in June 2022), with an increase of 250 basis points.
8. In April 2024, **the interest rate on total amounts of deposits** (current accounts, savings deposits and certificates of deposit), **is 1.05%** (1.04% in the previous month; 0.32% in June 2022).
9. **The interest rate on current account deposits increased to 0.59%** (0.57% in the previous month), taking into account that the current account allows the use of a multitude of services and does not have the function of investment (cf. Table 2).

SPREAD BETWEEN THE LENDING RATE AND DEPOSIT RATE

10. The **spread on new business** (calculated as the difference between the rates on new loans and new funding) with household and non-financial corporations **in Italy**, in April 2024, is **187 basis points**.

CUSTOMER FUNDING TREND

11. **Indirect funding**, i.e. investments in securities held by banks (both under management and held directly by customers) shows an **increase of about 215 billion between March 2023 and March 2024** (137.1 billion attributable to households, 21.2 to non-financial corporations and the remaining to other sectors, financial companies, insurance companies, public administration).

12. In April 2024 **medium- and long-term funding**, i.e. through bonds, increased over the last 12 months by **20.4%** (+18.8% in the previous month).

13. Consequently, **deposits** (current accounts, certificates of deposit, repurchase agreements) **decreased**, in the same month, **by 1.4%** yoy.

14. In April 2024, **total funding** (deposits from resident customers and bonds) **increased by 0.9%** yoy continuing the growing trend of the previous month (+2.1% in March 2024 and +0.9% in February 2024; cf. *Table 3*).

BANK LENDING

15. The decline in credit volumes is consistent with the slowdown in economic growth which contributes to depressing the demand for loans: in April 2024, **loans to households and non-financial corporations were down by 2.5%** compared to a year earlier while in March 2024 they had recorded a **decrease of 2.6%** when loans to non-financial corporations were down yoy by 3.9% and those to households by 1.4% (cf. *Table 4*).

CREDIT QUALITY

16. **Net bad loans** (i.e. net of the write-downs and provisions already made by the banks with own resources) at nominal value, in March 2024 amounted at **16.9 billion euros** (17.4 billion in the previous month). Compared to the highest level of net bad loans reached in November 2015 (88.8 billion), the decline is 71.9 billion euros.
17. **The ratio of net bad loans to total loans** is **1.01%** in March 2024, (1.03% in February 2024; 4.89% in November 2015; *cf. Table 5*).
