

ABI MONTHLY REPORT¹ – November 2024 (Main evidence)

Since October 2023, market rates have decreased. In the most recent weeks, this downward trend has continued as a result of ECB rate cuts and also anticipating further ECB's decision.

MARKET RATES

In the first 14 days of November:

1. **The 3-month Euribor rate** averaged **3.04%** (**3.17%** was the October average) **decreasing by 13 basis points compared to October 2024**. The decrease is **96 basis points** compared to the peak value recorded in October 2023.
2. **The six-month BOT rate** was on average **2.95%** (**2.99%** in October) **decreasing by 4 basis points**. The decrease is **110 basis points** lower compared to the peak value recorded in October 2023.
3. **The 10-year IRS rate** (widely used in mortgages) averaged **2.39%** (**2.43%** in October) **decreasing by 4 basis point**. The decrease is **114 basis points** compared to the peak recorded in October 2023.
4. **The BTP rate** was on average **3.66%** (**3.51%** in October) **increasing by 15 basis points**. Compared to the peak recorded in October 2023 it decreased by **133 basis points**.

LENDING INTEREST RATES

5. In October 2024:

¹ The ABI monthly report makes available a series of quantitative information before any other survey regarding the same data. This is possible because the banks themselves have produced this information.

- **the average rate on new business loans decreased to 4.60%** compared to 4.90% in September 2024 and 5.45% in December 2023;
- **the average rate on new loans for house purchasing decreased to 3.28%**, compared to 3.31% in September and lower compared to 4.42% in December 2023;
- **the average rate on total loans** (therefore agreed upon over the years) **decreased to 4.61%** from 4.70% in the previous month (cf. Table 1).

INTEREST RATES ON BANKING FUNDING

6. The **interest rate on new deposits with agreed maturity** (i.e. certificates of deposit and time deposits) in October 2024 **was 3.14%**. In September 2024 this interest rate was higher than the euro area average (3.35% in Italy; 3.17% in euro area). **Compared to June 2022**, when the interest rate was 0.29% (the last month before the start of the official interest rate hikes) **the increase is equal to 285 basis points**.
7. **The yield on new fixed-rate bond issues in October 2024 is 3.83%** with an increase of 252 basis points compared to 1.31% in June 2022.
8. In October 2024, **the interest rate on total amounts of deposits** (current accounts, savings deposits and certificates of deposit), **is 0.96%** (0.99% in the previous month; 0.32% in June 2022).
9. **The interest rate on current account deposits is 0.48%** (0.52% in the previous month; 0.02% in June 2022), taking into account that the current account allows the use of a multitude of services and does not have the function of investment (cf. Table 2).

SPREAD BETWEEN THE LENDING RATE

10. The **spread on new business** (calculated as the difference between the rates on new loans and new funding) with household and non-financial corporations **in Italy**, in October 2024, decreased to **159 basis points** (191 basis points in the previous month).

STOCK OF CUSTOMER FUNDING

11. **Indirect funding**, i.e. investments in securities held by banks (both under management and held directly by customers) shows an **increase of about 208 billion between September 2023 and September 2024** (84.4 billion attributable to households, 15.4 to non-financial corporations and the remaining to other sectors, financial companies, insurance companies, public administration).
12. In October 2024 **medium- and long-term funding**, i.e. through bonds, increased over the last 12 months by **8.7%** (+9.6% in the previous month).
13. **Deposits**, in their various forms, in October 2024 **increased by 2.4% yoy** (+0.5% in the previous month).
14. In October 2024, **total funding** (deposits from resident customers and bonds) **increased by 3.2% yoy** continuing the positive trend observed since the beginning of the year (+1.6% in September 2024; cf. *Table 3*).

BANK LENDING

15. The decline in credit volumes is consistent with the slowdown in economic growth which contributes to depressing the demand for loans: in October 2024, **loans to households and non-financial corporations were down by 2.0%** compared to a year earlier; **in September 2024 loans to non-financial corporations were down yoy by 2.4% and those to households by 0.4%** (cf. *Table 4*).

CREDIT QUALITY

16. **In September 2024, net non-performing loans** (i.e., the total of bad loans, unlikely-to-pay exposures, and past due and/or overdrawn exposures, calculated net of write-downs and provisions already made by the banks) decreased to **30.9 billion euros** from 31.9 billion in June 2024 (30.5 billion in December 2023). Compared to their peak level of 196.3 billion reached in 2015, they have decreased by 165 billion.
17. **In September 2024, net non-performing loans represented 1.49% of total loans.** In June 2024, this ratio was 1.51% (1.41% in December 2023; 9.8% in 2015; cf. *Table 5*).
