

ABI MONTHLY REPORT¹ – October 2024 (Main evidence)

Since October 2023, market rates have decreased, anticipating the ECB's decision. In the most recent weeks, this downward trend has continued.

MARKET RATES

In the first 10 days of October:

1. **The 3-month Euribor rate** averaged **3.24% (3.43% in September) decreasing by 19 basis points.** The decrease is **76 basis points** compared to the peak value recorded in October 2023.
2. **The six-month BOT rate** was on average **3.08% (3.19% in September) decreasing by 11 basis points.** The decrease is **97 basis points** lower compared to the peak value recorded in October 2023.
3. **The 10-year IRS rate** (widely used in mortgages) averaged **2.43% (2.44% in September) decreasing by 1 basis point.** The decrease is **110 basis points** compared to the peak recorded in October 2023.
4. **The BTP rate** was on average **3.50% (3.54% in September) decreasing by 4 basis points.** The decrease is **148 basis points** compared to the peak recorded in October 2023.

LENDING INTEREST RATES

5. In September 2024:

¹ The ABI monthly report makes available a series of quantitative information before any other survey regarding the same data. This is possible because the banks themselves have produced this information.

- **the average rate on new business loans decreased to 4.96%** compared to 5.13% in August 2024 and 5.45% in December 2023;
- **the average rate on new loans for house purchasing decreased to 3.33%**, compared to 3.59% in August and lower compared to 4.42% in December 2023;
- **the average rate on total loans** (therefore agreed upon over the years) **decreased to 4.69%** from 4.72% in the previous month (cf. Table 1).

INTEREST RATES ON BANKING FUNDING

6. The **interest rate on new deposits with agreed maturity** (i.e. certificates of deposit and time deposits) in September 2024 **was 3.32%**. In August 2024 this interest rate was higher than the euro area average (3.30% in Italy; 3.24% in euro area). **Compared to June 2022**, when the interest rate was 0.29% (the last month before the start of the official interest rate hikes) **the increase is equal to 303 basis points**.
7. **The yield on new fixed-rate bond issues in September 2024 is 2.97%** with an increase of 166 basis points compared to 1.31% in June 2022.
8. In September 2024, **the interest rate on total amounts of deposits** (current accounts, savings deposits and certificates of deposit), **is 0.99%** (1.00% in the previous month; 0.32% in June 2022).
9. **The interest rate on current account deposits is 0.52%** (0.54% also in the previous month; 0.02% in June 2022), taking into account that the current account allows the use of a multitude of services and does not have the function of investment (cf. Table 2).

SPREAD BETWEEN THE LENDING RATE

10. The **spread on new business** (calculated as the difference between the rates on new loans and new funding) with household and non-financial corporations **in Italy**, in September 2024, decreased to **198 basis points** (212 basis points in the previous month).

STOCK OF CUSTOMER FUNDING

11. **Indirect funding**, i.e. investments in securities held by banks (both under management and held directly by customers) shows an **increase of about 184 billion between August 2023 and August 2024** (94.5 billion attributable to households, 15.9 to non-financial corporations and the remaining to other sectors, financial companies, insurance companies, public administration).
12. In September 2024 **medium- and long-term funding**, i.e. through bonds, increased over the last 12 months by **10.6%** (+12.2% in the previous month).
13. **Deposits**, in their various forms, in September 2024 **increased by 0.3% yoy** (+2.0 % in August 2024).
14. In September 2024, **total funding** (deposits from resident customers and bonds) **increased by 1.5% yoy** continuing the positive trend observed since the beginning of the year (+3.2% in August 2024; cf. *Table 3*).

BANK LENDING

15. The decline in credit volumes is consistent with the slowdown in economic growth which contributes to depressing the demand for loans: in September 2024, **loans to households and non-financial corporations were down by 1.2%** compared to a year earlier, slowing down from the decline observed in **August 2024 (-2.0%)** when **loans to non-financial corporations were down yoy by 3.5% and those to households by 0.6%** (cf. *Table 4*).

CREDIT QUALITY

16. In **August 2024, net non-performing loans** (i.e., the total of bad loans, unlikely-to-pay exposures, and past due and/or overdrawn exposures, calculated net of write-downs and provisions already made by the banks) slightly increased to **31.1 billion euros** from 30.6 billion in March 2024 (30.5 billion in December 2023). Compared to their peak level of 196.3 billion reached in 2015, they have decreased by 165 billion.
17. In **August 2024, net non-performing loans represented 1.49% of total loans**. In March 2024, this ratio was 1.45% (1.41 in December 2024; 9.8% in 2015; cf. *Table 5*).
